Surpassing the sensitivity of RF technology, VRF™ provides superior level detection. The VRF™ series uses Variable Radio Frequency to detect the presence or absence of material in a vessel by compensating for the load of the probe, as well as the load induced by vessel environment, and automatically determining the optimal operating frequency for the greatest sensitivity and stability. At initial startup, the sensor detects the characteristics of air (no load) and calibrates to it. If installed in material, when the load is reduced (material leaves probe), the VRF™ senses this change and automatically recalibrates to its new condition without the need of an operator or technician.

Bindicator® manufactures an array of VRF™ probes, each tailored for specific applications. When combined with our large selection of probes, we have a VRF™ sensor for virtually every application. Please consult one of our representatives or call the factory for application assistance.

How to Order VRF-2000 Integral Series

VRF-2:

**Assembly Configuration**
- **A**: ¾” S.S. & 1½” Aluminum & Flush Probes
- **B**: Pipe Ext. Probe, S.S. Coupling & Connection
- **C**: Pipe Ext. Probe, Plated Coupling & Aluminum Connection
- **S**: Sanitary Connection 1” or 1½” Tri-clamp Size (See Note 1)
- **H**: ¾” Hastelloy C (For Teflon® Probes Only)

**Enclosure Type**
- **G**: General Purpose NEMA 4X
- **S**: Stainless Steel Type 304 NEMA 4X

**Probe Type**
- **D**: Standard Ryton®
- **1**: Standard Kynar® Coated (Max. Length 60” or 1.524mm)
- **2**: Food Grade Polysulfone
- **4**: Stub Polysulfone
- **5**: Heavy Duty Ryton®
- **6**: Heavy Duty Kynar® Coated
- **7**: Dome Flush (Use “A” Configuration Only) [Specify Thickness - See Note 2]
- **8**: Dome Flush (Use “A” Configuration Only)
- **A**: Armored Food Grade (Use “A” Configuration Only)
- **J**: Jumbo (Use “A” Configuration Only) [Enclosure Type G or D Only]
- **T**: Teflon® Jacketed Standard
- **U**: Teflon® Jacketed Heavy Duty

**Voltage**
- **A**: AC 85-265 VAC
- **D**: DC 9-36 VDC

**VRF-2000 Series**

**Note 1**: For 3A Sanitary Certification add “3A” at end of the model code. Configuration “S” must be used and either Type 2 Food Grade probe or Type 4 Stub probe.

**Note 2**: Thickness of probe must be specified: ¾”, 1½”, 1¾” or 1¾” wall thickness.

---

**Features and Benefits**

- **Opti-Sense™**
  - Uses variable radio frequency (VRF™) technology to determine the optimal operating frequency for greatest sensitivity and stability
- **Wide Variety of Probe Options**
  - Unequaled application versatility
- **Test In Place**
  - Test by using a magnetic fob without removing the cover
- **Pre-Guard™**
  - Probe design ignores material buildup on probe
- **EZ-Cal™ II**
  - No initial manual calibration required
- **Explosion Proof & Stainless Steel Enclosures Available**
  - Provides more options for a wide range of applications
- **Calibration Status and Alarm Lights**
  - Green LED indicates calibration status, red LED indicates alarm status

---

**Dimensions**

**VRF-2000 Cable Series**

**VRF-2000 Integral Series**

**VRF-2000 Series**

---

**Note 2**: Thickness of probe must be specified: ¾”, 1½”, 1¾” or 1¾” wall thickness.
Specifications

Electrical Specifications for Integral and Cable Series

Universal Input Power: 85 VAC - 265 VAC
DC input power: 9 VDC - 36 VDC

Power: 5 Watts
Output Relay: DPDT 6 amps @ 240 VAC, 6 amps @ 30 VDC, Minimum load 12V/100mA
Temperature Range: -40°F to 158°F (-40°C to 70°C)
Sensitivity: Rotary-switch selectable for 0.5pF, 1pF, 2pF, 3pF, 5pF, 8pF, 10pF, or 15pF
Time Delay: Rotary-switch selectable for 200 milliseconds, 1, 2, 5, 10, 20, 30, or 60
Time Delay Mode: Time delay for activating/deactivating the alarm or both
Fail Safe: High-low level failsafe dip-switch
Calibration: Push-button, intelligent recalibration, external magnetic tab
Approvals: FM and CSA listed for non-hazardous enclosure types NEMA 4X

Dimensions

VRF-2000 Integral Series

Note 1: Maximum length 45 feet (13.71m) or 540 inches (13716mm).

The VRF™ Cable Series should be used when tank mid or low-level monitoring is desired and the unit must be mounted from the top of the tank. The Cable Series provides the same features and reliability of the standard probe series, however, with a bendable cable, the unit can be conveniently mounted in enclosed environments.
