**R420 Rate Indicator/Transmitter**

*Microprocessor based rate indicator/transmitter totalizer*

**Cutout: 5.38" W x 2.62" H**

</table>
| **Control Inputs** | Pulse or contact closure. There are five wired control inputs that can be used for remote operations.  
1. Unlatched totalizer set point output.  
2. Reset totalizer count.  
3. Unlatched rate Hi/Lo set point output.  
4. Unlatched totalizer and rate set point outputs.  
5. Reset totalizer count, unlatch totalizer and rate Hi/Lo set point outputs. |
| **Current output** | 4-20 mA. Loop power may be obtained from the internal 24 VDC supply. Load impedance: 1000 Ohms at 24 VDC.  
Response Time: 0.5 Sec. or (follows rate indicator).  
Accuracy: + 0.1% of point at 70 °F.  
+ 0.25% over temp. range. |
| **Control Output** | Four electronic outputs may be used to drive electromechanical devices, lights, alarms, computer. Outputs are capable of controlling loads up to 150 mA max., 30 VDC max.  
1. Scaled pulse output with designated pulse width.  
2. Totalizer set point output.  
3. Low rate set point output.  
4. High rate set point output.  
Note: Rate Hi/Lo Set point output operations may either: follow the flow, be latched, or be timed from 0.01 to 99.99 seconds. The totalizer set point output operation may be either: latched, or timed from .01 to 99.99 seconds. |
| **K Factor** | 0.0001 to 99999 |
| **Accuracy** | + 0.05% of point. |
| **Rate Update** | 99 sec. max. to 0.5 sec. min. |
| **Rate Smoothing** | Designate 0.5 to 7.5 second dynamic averaging on 0.5 second increments appropriate to flow input speed to 2 HZ and above. |
| **Temperature** | Operating: 32 to 131°F (0 to 55°C)  
Storage: -40 to 158°F (-40 to 70°C) |

The model R420 microprocessor based rate indicator/transmitter totalizer, affords you the ability to display rate, total and (low/high) set points. The transmitter also supplies outputs for driving lights, alarms, totalization for remote and 4-20 mA signal for communication with recorders or like equipment.

A special mode gives you the capability of viewing two parameters such as rate and total at the same time. The R420 contains a set point lockout system to prevent unauthorized changes from the front panel.

The R420 is equipped with an easy to use menu system for programming. The transmitter features a 10-year memory back-up of all program settings, in case of power failure.

The R420 has RS-485 communications for interfacing with a computer.

www.elster.com
Power Supply: 115 VAC. When powered from AC source, the R420 will output
24 VDC at 100 milliams max. The unit may also be powered by 18 to 27 VDC
if AC power is not used.

Display: Six digit flow rate indication. Three alphabetical character display flow rate
units. Ten digit flow totalization.

Weight: 2 lbs.

Enclosure: Panel Mount: Key Pad is NEMA 4x with gasket.

Communication: Type: RS-485 multidrop wiring terminals.

Wiring Terminals: 14 AWG max., detachable.

Dimensions: Panel Cutout:  Panel: Front Panel:
Height: 2.62” Height: 3.42”
Width: 5.38” Width: 6.18”
Depth: 4.125”
