Features

- Control sensitivity of 1” water column allows use in precision applications.
- Large Exhaust Valve provides high exhaust flows.
- An Aspirator Tube compensates pressure droop under flow conditions.
- A separate Control Chamber isolates the diaphragm from the main flow to eliminate hunting and buzzing.
- Unit construction lets you service the Model 4500ABP without removing it from the line.

Operating Principles

The Model 4500ABP Booster is a pneumatic device capable of high flow capacity. This device uses a force balance system to open the relief valve and vent system pressure when set point is exceeded. When system pressure increases, the force on the bottom of the Diaphragm Assembly increases beyond the set point, the assembly moves upward, lifting the Relief Valve from its seat and vents the system air.

If system pressure decreases below the set point, the assembly moves downward closing the Relief Valve.

Catalog Information

Catalog Number
Ratio 45 ABP

Pipe Size
- 3/8" NPT. 3
- 1/2" NPT. 4
- 3/4" NPT. 6

Options
- BSPT (Tapered) U H
- BSPP (Parallel) J
- Viton Elastomers

Actuator
- Knob
- Tamperproof

* BSPP Threads in Inlet, Outlet, Exhaust & Bonnet Ports Only. Others BSPT

Installation

For installations instructions, refer to the corresponding Fairchild Model 4500ABP Pneumatic Volume Booster Instruction, Operation and Maintenance Instructions.

Model 4500ABP Mounting Bracket
Kit P/N 20555-1 zinc plated (sold separately)
