The Honeywell 5000TC toroidal (electrodeless) conductivity sensors measure the conductivity of solutions from 0.2 to 2000 milliSiemens/cm. The sensors can also be used for monitoring chemical concentration as well as salinity. The corrosion and fouling-resistant probes are available with a variety of mounting assemblies to ensure compatibility for applications in the chemical, food and dairy, refinery, pulp and paper, metal finishing and wastewater industries.

THE FEATURES AND RELIABILITY YOU EXPECT FROM HONEYWELL

- Variety of material types to meet most application needs – PEEK, PFA Teflon®, PVDF, and Polypropylene.
- Increased cell reliability due to high chemical resistance and low friction factor in the materials of construction.
- Flexibility of installations with four mounting types – Immersion, Union-mount, Insertion/Removal, and Sanitary.
- Temperature compensated measurement with Pt1000 ohm RTD.
- Convenient for most applications – 20 ft. cable standard.
- 3A-approved materials of construction and CIP (clean-in-place) fitting makes the sanitary type cells suitable for most sanitary applications.

CONVERTIBLE STYLE

The 5000TC convertible style toroidal sensor includes both a 3/4-inch and a 1/2-inch fitting to allow direct fastening to the end of a pipe for either immersion mounting or a union-mount adapter for a standard 2-inch pipe tee. The convertible style can also be insertion mounted into a 2-inch ball valve assembly.

SANITARY STYLE

The 5000TC sanitary style toroidal sensor includes a clean-in-place style fitting and is constructed of 3A-approved materials. It has an integral 2-inch sanitary-mount flange which mates to Honeywell sanitary tee mounting hardware. The sanitary-style sensor includes a special cap and EPDM compound gasket. The gasket is also available separately for mounting to a 2-inch sanitary clamp-type ferrule or butt-weld tee.
A VARIETY OF MOUNTING TYPES

The 5000TC sensors are available with a number of different mounting types. These include immersion mounting (CPVC or PVDF materials, also PVC junction box), union mounting (316 SS, CPVC or PVDF materials with optional 2-inch tee), sanitary mounting (316 SS 2-inch tee with heavy-duty clamp), or insertion/removal mounting (316 SS or CPVC material).

CHEMICAL COMPATIBILITY ISSUES MINIMIZED

To simplify chemical resistance problems, these sensors are constructed so that only one material is wetted by the process. The wetted material is non-conductive to insure that the sensor is electrically isolated from the process fluid. Convertible sensors are available in PEEK, PVDF, PFA Teflon®, and Polypropylene materials. Sanitary sensors are available in PVDF, PFA Teflon®, and Polypropylene materials.

WORKS WITH HONEYWELL’S APT2000 TC TRANSMITTER

All 5000TC cells work with the APT2000 Toroidal Conductivity process transmitter from Honeywell. This two-wire, loop-powered transmitter is designed to continuously measure conductivity, chemical concentration and salinity in industrial processes within the chemical, food and dairy, pulp and paper, refinery, and metals industries.

SENSOR SPECIFICATIONS

<table>
<thead>
<tr>
<th>Wetted Materials</th>
<th>PFA Teflon®, Polypropylene, PVDF, or PEEK</th>
</tr>
</thead>
<tbody>
<tr>
<td>Operating Temperature Range</td>
<td>10 to 125°C (14 to 257°F)</td>
</tr>
<tr>
<td>Maximum Flow Rate</td>
<td>10 ft. (3 m) per second</td>
</tr>
<tr>
<td>Measuring Range</td>
<td>0.2 to 2000 milliSiemens/cm</td>
</tr>
<tr>
<td>Temperature Compensator</td>
<td>Pt 1000Ω RTD</td>
</tr>
<tr>
<td>Sensor Cable</td>
<td>5 conductor (plus two isolated shields) cable with XLPE (cross-linked polyethylene) jacket; rated to 150°C (302°F); 20 ft. (6 m) long</td>
</tr>
<tr>
<td>Bore Size</td>
<td>1.5-inch diameter, 0.4-inch hole</td>
</tr>
</tbody>
</table>

PRESSURE/TEMPERATURE LIMITS:

| Sensor Only (no hardware) | Polypropylene 100 psi at 212°F (6.9 bar at 100°C) |
| PVDF 100 psi at 248°F (6.9 bar at 120°C) |
| PEEK 200 psi at 302°F (13.8 bar at 150°C) |
| PFA Teflon® 200 psi at 302°F (13.8 bar at 150°C) |
