VEGACAL 64
For connection to a signal conditioning instrument

Capacitive rod electrode for continuous level measurement of adhesive products

**Technical data**

**Materials**

The wetted parts of the instrument are fully FEP insulated. You will find a complete overview of the available materials and seals in the "configurator" on our homepage under www.vega.com/configurator.

**Housing versions**

The housings are available as single chamber or double chamber version in plastic, stainless steel or aluminium. They are available in protection ratings up to IP 68 (1 bar).

**Electronics versions**

The instruments are available in different electronics versions. Apart from the two-wire electronics with 4 ... 20 mA/HART, there are two pure digital versions with Profibus PA and Foundation Fieldbus possible as well as one version for connection to a signal conditioning instrument.

**Approvals**

The instruments are suitable for use in hazardous areas and are approved e.g. according to ATEX and IEC. The instruments have also different ship approvals such as e.g. GL, LRS or ABS. You can find detailed information on the existing approvals in the "configurator" on our homepage under www.vega.com/configurator.

**Area of application**

The VEGACAL 64 level sensor for conductive liquids. The rod electrode is fully insulated and is suitable for viscous and adhesive products.

**Advantages**

- Reduced number of cleaning cycles through measurement insensitive to buildup
- Maximum use of the vessel, because measurement over the complete probe length
- Long lifetime and low maintenance requirement through robust mechanical construction

**Function**

Sensor and vessel form the two electrodes of a capacitor. A capacitance change caused by a level change is evaluated by the integrated electronics and converted into a respective output signal. The level measurement is carried out via the complete sensor length without a dead zone.
**Operation**

The operation of the instrument is carried out via a VEGAMET signal conditioning instrument.

**Electrical connection**

Electronics and connection compartment, single chamber housing

1. Ground terminal for connection of the cable screen
2. Spring-loaded terminals for voltage supply

You can find details on the electrical connection in the instrument operating instructions on our homepage at www.vega.com/downloads.

**Dimensions**

1. Threaded version
2. Flange version
3. Threaded version with temperature adapter

**Information**

You can find further information about the VEGA product line on our homepage www.vega.com.

In the download section under www.vega.com/downloads you'll find free operating instructions, product information, brochures, approval documents, instrument drawings and much, much more.

There, you will also find GSD and EDD files for Profield PA systems as well as DD and CFF files for Foundation Fieldbus systems.

**Instrument selection**

With the "finder" you can select the most suitable measuring principle for your application: www.vega.com/finder.
