VEGAFLEX 81
4 … 20 mA/HART - two-wire

TDR sensor for continuous level and interface measurement of liquids

Application area
With VEGAFLEX 81 you can measure all kinds of liquids essentially maintenance free. The sensor delivers precise and reliable measured values even in applications with steam, buildup, foam generation or condensation. VEGAFLEX 81 is a truly cost-effective level and interface sensor for your measuring task.

Your benefit
- The guided adjustment enables a simple, time-saving and reliable setup
- Comprehensive diagnosis options ensure maintenance-friendly operation and thus high plant availability
- Shortenable probes allow simple standardization and maximum flexibility in planning

Function
High frequency microwave pulses are coupled onto a cable or rod and guided along the probe. The pulse is reflected by the product surface. The time from emission to reception of the signals is proportional to the level in the vessel.

Technical data
- Measuring range
  - Cable probe: up to 75 m (246.1 ft)
  - Rod probe: up to 6 m (19.69 ft)
- Measuring accuracy: ± 2 mm
- Process fitting: Thread from G¾, ¾ NPT; flanges from DN 25, 1”
- Process pressure: -1 … +40 bar/-100 … +4000 kPa (-14.5 … +580 psig)
- Process temperature: -40 … +200 °C (-40 … +392 °F)
- Ambient, storage and transport temperature: -40 … +80 °C (-40 … +176 °F)
- Operating voltage: 9.6 … 35 V DC

Materials
The wetted parts of the instrument are made of stainless steel. The instrument seal is made either of FKM, FFKM or EPDM. You will find a complete overview of the available materials and seals in the "configurator" on our homepage under www.vega.com/configurator.

Housing versions
The housings are available as single chamber or double chamber version in plastic, stainless steel or aluminum. They are available with protection ratings up to IP 68 (1 bar).

Electronics versions
The instruments are available in different electronics versions. Apart from the two-wire electronics with 4 … 20 mA/HART, a four-wire version and two purely digital versions with Profibus PA and Foundation Fieldbus are available.

Approvals
The instruments are suitable for use in hazardous areas and are approved e.g. according to ATEX and IEC. The instruments also have various ship approvals such as e.g. GL, LRS or ABS. You can find detailed information on www.vega.com/downloads and "Approvals".
Adjustment

The adjustment of the instrument is carried out via the optional indicating and adjustment module PLICSCOM or via a PC with the adjustment software PACTware and corresponding DTM. Further adjustment options are available via HART communicator as well as manufacturer-specific programs such as AMS™ or PDM.

Electrical connection

Electronics and connection compartment, single chamber housing

1. Voltage supply/Signal output
2. For indicating and adjustment module or interface adapter
3. For external indicating and adjustment unit
4. Ground terminal for connection of the cable screen

You can find details of the electrical connection in the operating instruction of the instrument on www.vega.com/downloads.

Dimensions

VEGAFLEX 81
1. Cable version
2. Rod version
3. Flange version

Information

You can find further information about the VEGA product line on www.vega.com.

In the download section under www.vega.com/downloads you’ll find operating instructions, product information, brochures, approval documents, instrument drawings and much, much more.

There, you will also find GSD and EDD files for Profinet PA systems as well as DD and CFF files for Foundation Fieldbus systems.

Instrument selection

With the "Finder" on www.vega.com/finder and "VEGA Tools" you can select the most suitable measuring principle for your application.

You can find detailed information on the instrument versions in the "Configurator" on www.vega.com/configurator and "VEGA Tools".

Contact

You can find the VEGA agency serving your area on our homepage www.vega.com.
