VEGAPULS 62
4 ... 20 mA/HART two-wire

Radar Sensor for Continuous Level Measurement

Application Area
VEGAPULS 62 is suitable for applications in liquids in storage tanks and process vessels under difficult process conditions. The application possibilities can be found in the chemical industry, environmental and recycling technology, and in the petrochemical industry.

Advantages
- Non-contact measurement
- Simple mounting
- Wear and maintenance-free
- Unaffected by pressure, temperature, gas, and dust
- High accuracy

Function
Extremely short microwave impulses are emitted by the antenna system in the direction of the measured product, reflected by the product surface, and received back again by the antenna system. The time from emission to reception of the signals is proportional to the level. A special processing procedure ensures reliable and precise measurement.

Materials
The wetted parts of the instrument are made of 316L, Hastelloy C22, Monel Alloy, stainless steel precision casting 1.4848 PTFE, PP, and PEEK. The process seal is made from FKM, FFKM, or graphite.

Housing Versions
The housings are available as single chamber or double chamber version in plastic, stainless steel, or aluminum. They are available in protection ratings up to IP 68 (1 bar).

Electronics Versions
The instruments are available in different electronics versions. Apart from the two-wire electronics with 4 ... 20 mA/HART, a four-wire version and two purely digital versions with Profinet PA and Foundation Fieldbus are available.

Approvals
The instruments are suitable for use in hazardous areas and are approved according to FM, CSA, ATEX, and IEC. The instruments also have different ship approvals such as GL, LRS, or ABS.
**Operation**

The adjustment of the instrument is carried out via the optional indicating and adjustment module PLICSCOM or via a PC with the adjustment software PACTware and respective DTM. Further adjustment options are available via HART communicator as well as manufacturer-specific programs such as AMS™ or PDM.

---

**Electrical Connection**

Electronics and connection compartment, single chamber housing

1. **Voltage Supply/Signal Output**
2. **For Indicating and Adjustment Module or Interface Adapter**
3. **For External Indicating and Adjustment Unit**
4. **Ground Terminal for Connection of the Cable Screen**

---

**Dimensions**

Dimensions VEGAPULS 62

1. **Version with Encapsulated Antenna System**
2. **Version with Plastic Horn Antenna**
3. **Mounting Strap**
4. **Adapter Flange**
