VEGAPULS 66
4 ... 20 mA/HART two-wire

Radar Sensor for Continuous Level Measurement

Materials

The wetted parts of the instrument are made of 316L, Hastelloy C22, PTFE or ceramic. The process seal is made of FKM, FFKM, FEP, EPDM, PTFE, or graphite.

Housing Versions

The housings are available as single chamber or double chamber version in plastic, stainless steel, or aluminum. They are available in protection ratings up to IP 68 (1 bar).

Electronics Versions

The instruments are available in different electronics versions. Apart from the two-wire electronics with 4 ... 20 mA/HART, a four-wire version and two purely digital versions with Profinet PA and Foundation Fieldbus are available.

Approvals

The instruments are suitable for use in hazardous areas and are approved according to FM, CSA, ATEX, and IEC. The instruments also have different ship approvals such as GL, LRS, or ABS.

Application Area

VEGAPULS 66 is suitable for measuring liquids under difficult and extreme process conditions. The application possibilities can be found in the chemical industry, environmental and recycling technology, and the petrochemical industry.

Advantages

- Non-contact measurement under high pressures and temperatures
- Simple mounting
- Wear and maintenance-free
- Unaffected by pressure, temperature, gas, and dust
- High accuracy

Function

Extremely short microwave impulses are emitted by the antenna system in the direction of the measured product, reflected by the product surface, and received back again by the antenna system. The time from emission to reception of the signals is proportional to the level. A special processing procedure ensures reliable and precise measurement.
**Operation**

The adjustment of the instrument is carried out via the optional indicating and adjustment module PLICSCOM or via a PC with the adjustment software PACTware and respective DTM. Further adjustment options are available via HART communicator as well as manufacturer-specific programs such as AMS™ or PDM.

---

**Dimensions**

Dimensions VEGAPULS 66

1. Version with Horn Antenna
2. Version with Standpipe Antenna

---

**Information**

You can find additional information about VEGA product offerings from our home page, www.vega-americas.com. Brochures, operating instructions, quick reference guides, specification sheets, and drawings are also available from the Downloads section of our homepage.

---

**Device Selection**

The Downloads section of our home page, www.vega-americas.com provides application data sheets so you can select the measuring principle or product for your particular application.

---

**Contact**

Please call 1-800-543-8668, Monday through Friday, 8:00 A.M.-5:00 P.M., EST (Eastern Standard Time) if you have any questions. For emergencies after hours, call the number above and follow the voice mail instructions.

---

**Electrical Connection**

Electronics and connection compartment, single chamber housing

1. Voltage Supply/Signal Output
2. For Indicating and Adjustment Module or Interface Adapter
3. For External Indicating and Adjustment Unit
4. Ground Terminal for Connection of the Cable Screen
