VEGACAP 67
Two-wire

Capactive high temperature probe for level detection

Area of application
VEGACAP 67 is a universal point level sensor for bulk solids. The electrode is suitable for high temperature applications.

Advantages
- Universal use in bulk solids through wide temperature range
- Long lifetime and low maintenance requirement through robust mechanical construction
- High flexibility through shortenable probe

Function
Sensor and vessel form the two electrodes of a capacitor. A capacitance change caused by a level change is evaluated by the integrated electronics and converted into a switching signal. The capacitive measuring principle has no special requirements in respect to installation and mounting.

Materials
The wetted parts of the instrument are made of stainless steel. The probe insulation is made of ceramic. You will find a complete overview of the available materials and seals in the "configurator" on our homepage under www.vega.com/configurator.

Housing versions
The housings are available in plastic, stainless steel or Aluminium. They are available with protection ratings up to IP 67.

Electronics versions
The instruments are available in different electronics versions. Apart from the versions with transistor output, contactless electronic switch and relay output, a two-wire version for connection to a signal conditioning instrument is available.

Approvals
The instruments are suitable for use in hazardous areas and are approved e.g. according to ATEX and IEC. The instruments have also different ship approvals such as e.g. GL, LRS or ABS. You can find detailed information on the existing approvals in the "configurator" on our homepage under www.vega.com/configurator.
**Operation**

The mode and switching point of the limit switch are adjusted on the connected signal conditioning instrument.

**Electronics module - Two-wire output**

1. DI/ switch for measuring range selection (with compensation button)
2. Ground terminal
3. Connection terminals
4. Control lamp

**Electrical connection**

![Electrical connection diagram]

Wiring plan

1. Voltage supply

You can find details on the electrical connection in the instrument operating instructions on our homepage at www.vega.com/downloads.

**Dimensions**

![Dimensions diagram]

1. Cable version 300°C (572°F)
2. Rod version 300°C (572°F)
3. Version 400°C (752°F)

**Information**

You can find further information about the VEGA product line on our homepage www.vega.com.

In the download section under www.vega.com/downloads you'll find free operating instructions, product information, brochures, approval documents, instrument drawings and much, much more.

**Instrument selection**

With the "finder" you can select the most suitable measuring principle for your application: www.vega.com/finder.

You can find detailed information on the instrument versions in the "configurator" on our homepage under www.vega.com/configurator.

**Contact**

You can find the VEGA agency serving your area on our homepage www.vega.com.
