**Application Area**

The SHLM B and C sourceholders are designed for radiation-based measurement of applications including density, interface, and continuous and point level. The most common industries for the SHLM B and C include:

- Chemical
- Petrochemical
- Offshore
- Refining

**Advantages**

Recognizable benefits include:

- Rugged construction for harsh environments
- Standard ANSI flange for easy drywell mounting
- Convenient lifting lugs facilitate installation

**Function**

The SHLM B and C source holders are used for critically high pressure applications when the vessel walls are too thick for other sources. The SHLM B and C source holders use a stainless steel rod or cable actuator to place a source inside the vessel by way of a dry well.

**Fire Resistance**

+538 °C (+1000 °F) for 5 minutes

**Temperature**

-40 … +60 °C (-40 … +140 °F)

**Weight**

Consult Factory

**Materials**

The shielding material is lead. The cable/rod is stainless steel.

**Housing Versions**

The housing is available in carbon steel with polyester powder coating. Stainless steel housings are also available.

**Approvals**

The source holders are regulated by the U.S. Nuclear Regulatory Commission (NRC). Compliance certificates are issued by the State of Ohio under an agreement with the NRC.

**Operation**

Licensed technicians must complete the insertion of the source rod or cable for the source holders. Before inserting the rod or cable, the technician must remove the locking mechanism and upon completing the insertion, the technician must secure the rod or cable in the open position with the provided screw.
You can find additional information about VEGA product offerings from our home page, www.vega-americas.com. Brochures, operating instructions, quick reference guides, specification sheets, and drawings are also available from the Downloads section of our homepage.

Device Selection

The Downloads section of our home page, www.vega-americas.com provides application data sheets so you can select the measuring principle or product for your particular application.

Contact

Please call 1-513-272-0131, Monday through Friday, 8:00 A.M.-5:00 P.M., EST (Eastern Standard Time) if you have any questions. For emergencies after hours, call the number above and follow the voice mail instructions.
