

GLOBAL LEADER IN VALVE MONITORING & CONTROL

For 40 years, Westlock Controls has delivered industry leading valve monitoring and control solutions. Westlock's thoughtfully designed products are engineered to last, and equip customers with meaningful diagnostics to deliver desired operational performance.

APPLICATIONS

ON/OFF

SOLUTIONS

VALVE MONITORING

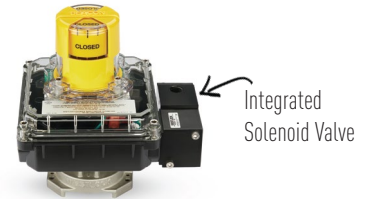

Select from limit switch sensing or more advanced 4-20mA position transmitters.

- Switch technology proven up to 100M cycles
- Embedded advanced fieldbus I/O available
- Transmitter uses non-contact Hall-effect sensing
- SS, AI & engineered resin enclosures

VALVE MONITORING + CONTROL

Add an integrated pilot valve, pre-wired to simplify your valve package.

- Reduce labor & enable ultra-fast commissioning
- Solenoid includes pressure indication diagnostic
- Choose from 3-Way and 4-Way Solenoid Valves
- Globally approved, reliable solenoid technology

MODULATING

SMART POSITIONER

Versatile control solution with touch-start auto-calibration, improved levels of reliability and easy to use interface.

- Simple auto-calibration & installation
- LCD & HART[®] for easy communication
- Non-contact Hall-effect position sensing
- Integrated 4-20mA position feedback transmitter
- Available with integrated limit switches

DIGITAL POSITIONER

Advanced positioner equipped with fieldbus protocols delivering enhanced diagnostics with actionable insights to keep your plant running.

- Advanced diagnostics for easy troubleshooting
- HART[®], FOUNDATION Fieldbus[™] and Profibus PA[™]
- Non-contact Hall-effect position sensing
- Available with remote mount for complex environments
- Integrated 4-20mA position feedback transmitter
